ONE-MINUTE PAPER

1. What is the most important thing you learned in class today?

Today we started the main topics i had good idea what I'm looking for and what we need to learn

I have learned general plan for the course and some specifics about the planned project (7 points)

It'll be the most useful things for us to read that recommended book and also work effectively

Knowing about the important of clean air, knowing what materials I need to read

2. What question remains uppermost in your mind?

Nothing yet . Thank you professor

Will the subject for the project be given or should we chose/ propose subject ourselves?

Which methodologies we will be using to evaluate air pollution.
