

CINAHL Ultimate

Introduzione a Cinahl *Ultimate*

A cura di Luisa Banzato e Lisa Dainese

Biblioteca Pinali

ultimo aggiornamento novembre 2024

Contenuti della presentazione

- illustrare gli elementi costitutivi di CINAHL
- offrire indicazioni di base per la ricerca bibliografica.

Per maggiori approfondimenti si rimanda agli strumenti didattici di Ebsco Host accessibili dall'Help comprendenti numerosi tutorial.

CINAHL Ultimate

Cinahl è la risorsa più completa di scienze infermieristiche e professioni sanitarie.

- Più di 1500 riviste in full text
- Copertura dal 1937
- Riferimenti citati da più di 3800 riviste
- E-book di area infermieristica e professioni sanitarie
- Evidence-based care sheets
- Quick lessons

- SmartText Searching [Hint](#)

Operatore logico
AND

Operatore logico
OR

il sistema cerca in base a un testo
fino a 500 caratteri inserito nel box

Opzioni e filtri

La ricerca può essere affinata grazie ai numerosi filtri selezionabili quali:

- la possibilità di escludere o limitare la ricerca agli articoli non ancora indicizzati, chiamati **Pre-Cinahl**,
- escludere record **Medline** (utile quando sia già stata fatta una ricerca in **Pubmed**)
- selezionare solo records di **riviste peer-reviewed** – cioè sottoposte a valutazione anonima di esperti... etc.)

E' rischioso inserire troppi filtri!

Esempio: home assistance

Value

Abstract: Home modification interventions have the potential to provide support to informal caregivers; however, the impact of these interventions on caregivers is understudied, and adequate assessments are lacking. This study describes the development and preliminary psychometric properties of a performance-based assessment that identifies environmental barriers to performance of daily caregiving activities. An existing assessment of person--environment fit was modified using key informant interviews and was administered to 31 informal caregivers. The In-Home Occupational Performance Evaluation for Providing Assistance demonstrated reliability across raters, good internal consistency for all subscales, and convergent validity with existing measures. This assessment has the potential to guide home modification interventions and measure the impact on informal caregiving in the home.

Abstract: Chapter 9 of the book "Oxford Handbook of Neuroscience Nursing," edited by Sue Woodward and Catheryne Waterhouse is presented. It discusses the issue on rehabilitation and prognosis of traumatic brain injury (TBI). Information is provided regarding the factors affecting disabilities from head injury, the short-term and long-term complications associated with TBI, and the development of Alzheimer's disease.

Ricerca con CINAHL headings

Si accede al vocabolario controllato dalla barra (voce CINAHL headings) oppure dal box di base attivando prima l'opzione Suggest Subject Terms

The screenshot displays the EBSCOhost search interface. At the top, a blue navigation bar contains the following menu items: "New Search", "Publications", "CINAHL Subject Headings", "Evidence-Based Care Sheets", "Quick Lessons", and "More". The "CINAHL Subject Headings" item is circled in red. Below the navigation bar, the EBSCOhost logo is visible on the left. The main search area includes a search bar with a vertical cursor, a dropdown menu labeled "Select a Field (optional)", and a green "Search" button. Below the search bar, there are three rows of search criteria, each starting with a dropdown menu set to "AND" and followed by a "Select a Field (optional)" dropdown. A "Suggest Subject Terms" checkbox is located above the first search bar and is also circled in red. To the right of the search bar, there is a "Clear" button with a question mark icon and a plus/minus button. At the bottom of the search area, there are links for "Basic Search", "Advanced Search", and "Search History".

Cliccando su Subject Headings vengono visualizzati sotto i termini più specifici (esplosione)

Combine selections with:

AND
 OR

La ricerca attraverso Cinahl Subject Heading permette sempre di selezionare sia il termine come Subject heading sia il termine in forma libera (Keyword) che viene presentato in fondo alla pagina.

Benché termini possano essere combinati utilizzando l'operatore AND oppure OR, l'opzione di default "OR" è quella utile a recuperare sia i termini con il Subject heading sia il termine espresso in forma libera.

Combinare le ricerche

È possibile sia utilizzare le righe/box selezionando gli operatori booleani

Oppure

Fare singole ricerche e combinarle con gli operatori logici dalla pagina Search history

E' possibile fare le ricerche contemporaneamente su più risorse presenti In EBSCO Host

1. Choose Databases

2. seleziono le risorse dal box

Uso di cartelle

È possibile selezionare e inserire dei records in una cartella per un uso immediato: stampa, spedizione email, salvataggio come file o esportazione (p. es. in RIS format)

Per salvare collezioni di records o strategie di ricerca è necessario crearsi un account in Cinahl

L'Ateneo ha acquistato molte banche dati dello stesso fornitore che si possono consultare dalla stessa piattaforma.

Creare una propria cartella significa salvare dati recuperati anche da E-Book Collection, Psychology and Behavioral Science, PsycINFO e SPORTDiscus e molto altro.
