The image shows the homepage of the University of Padua Library System. The header features the university's logo and name on the left, and search, language, and menu icons on the right. A large banner with a botanical illustration serves as the background. Overlaid on the banner is a search bar with the GalileoDiscovery logo and a search button. Below the banner, there are four main sections: 'About publishing: Open Access publishing agreements and discounts', 'Browse and borrow eBooks on MLOL – medialibrary.it', 'Library Welcome Kit: Start here!', and 'LibKey and BrowZine: Streamline bibliographic search'. A dark blue box on the right contains the text 'Need help?' and a button 'Ask the Library Helpline'.

Available at the library

With just **one query**, you can find the materials for your research, **regardless of their format** (books, articles, journals, etc.)

The screenshot shows the GalileoDiscovery website interface. At the top, a navigation bar contains a 'Main menu' (1) and a search bar (3). The search bar includes a 'Library catalogue' dropdown and a magnifying glass icon. To the right of the search bar is an 'Authentication' section (2) with 'Sign in' and 'Menu' links. Below the navigation bar, the 'GalileoDiscovery' logo is visible. The main content area is divided into three columns: 'GalileoDiscovery', 'Other resources', and 'The libraries of the Paduan Library System'. The 'GalileoDiscovery' column lists links such as 'Guide to GalileoDiscovery', 'Tutorials on GalileoDiscovery', 'Off-campus connection', 'Document delivery', 'Interlibrary loan', and 'Explore collections'. The 'Other resources' column lists links such as 'Phaidra - Digital Collections', 'Padua Research Archive', 'Research Data Unipd', 'Virtual exhibitions', 'MapFly - Cartography', and 'Other catalogues'. The 'The libraries of the Paduan Library System' column contains a paragraph about the Paduan Library System and its components. A 'NEW ARRIVALS' banner is visible in the bottom left corner. A purple box (4) highlights the 'The libraries of the Paduan Library System' section, which is also labeled 'Information boxes'.

[About Research Assistant](#)

[Privacy and disclaimer](#)

**Remember! To use the search assistant
you must be authenticated with SSO**

The **Research Assistant** is a tool that uses artificial intelligence to **simplify bibliographic searches** for academic content.

The results it provides must be verified. Furthermore, it does not handle follow-up or contextual questions, nor is it able to understand references to previous questions in the conversation.

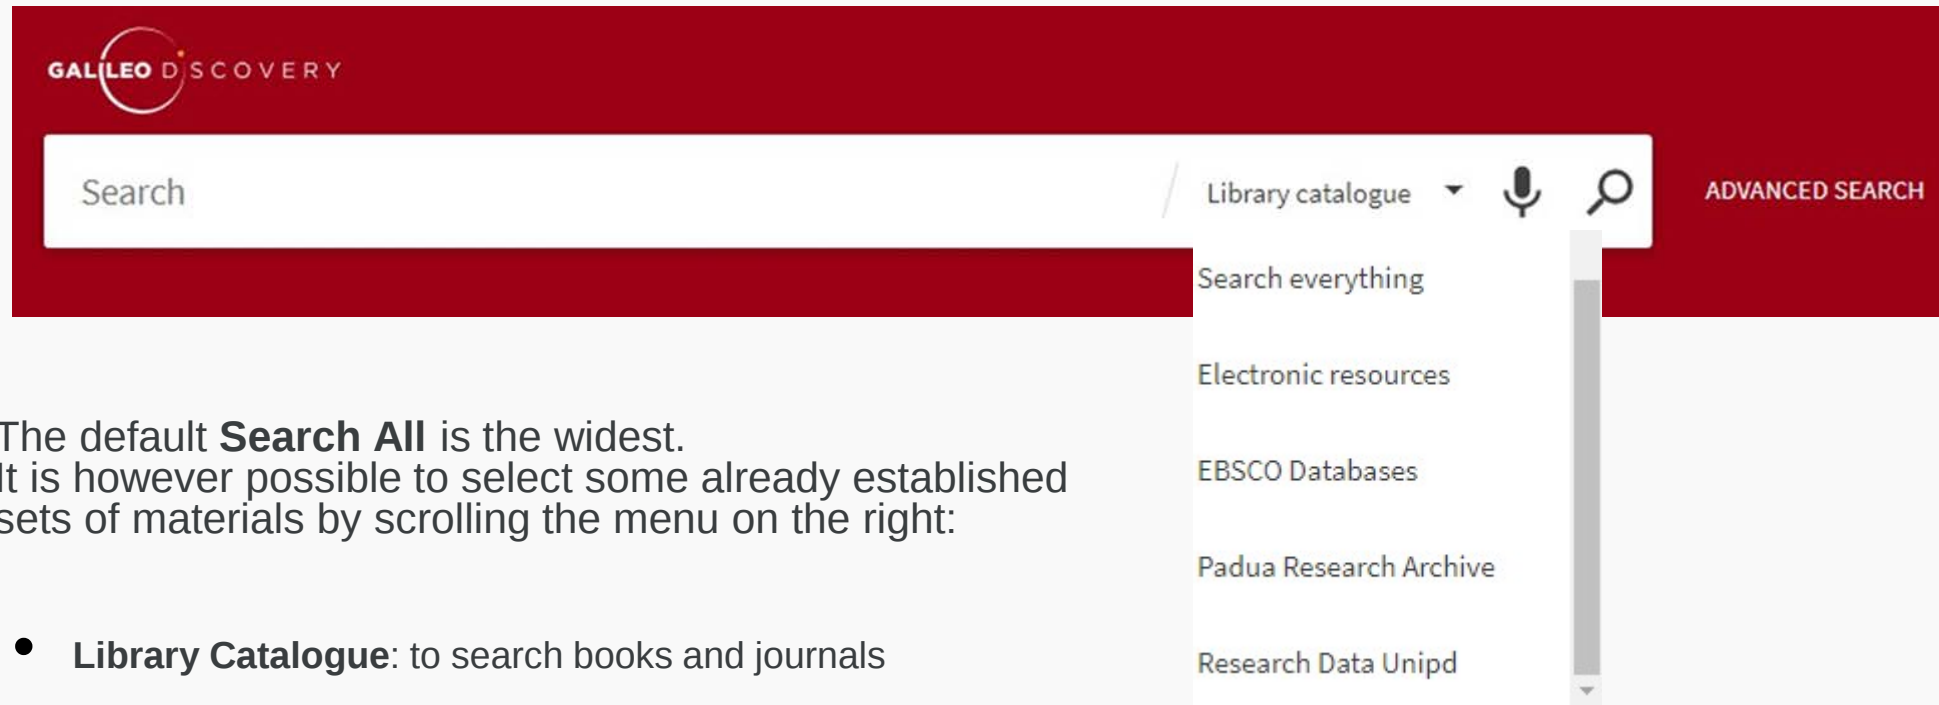

The screenshot shows the GalileoDiscovery interface. At the top, there's a navigation bar with links: NEW SEARCH, JOURNAL SEARCH, FETCH ITEM, DATABASE SEARCH, BROWSE, RESEARCH ASSISTANT, and a menu icon. Below this is a red header with the GalileoDiscovery logo and a search bar labeled 'Journal Search' with the placeholder text 'Title or ISSN'. Below the search bar is an alphabetical index from 0-9 to Z.

On the left, there's a sidebar titled 'Journals by category' with a list of categories: Arts, Architecture & Applied Arts; Business & Economics; Earth & Environmental Sciences; Engineering & Applied Sciences; General; Health & Biological Sciences; History & Archaeology; Journalism & Communications; Languages & Literatures; Law, Politics & Government; Music, Dance, Drama & Film. A red arrow points from the 'Earth & Environmental Sciences' category to the 'Search for journals' section.

The 'Search for journals' section has the heading 'Search for journals' and the text 'Use the following options to find journals:'. It lists two options: 'Enter a journal title in the search box.' and 'Use the Journals by category option to browse journals by category.'

On the right, there's a detailed view for the journal 'Environment and development economics (Online) 1996'. It includes a book icon, the journal title, the year '1996', and a link 'Available Online >'. Below this is a 'Send to' section with icons for 'EXPORT BIBTEX', 'ENDNOTE', 'EXPORT RIS', and 'PRINT'. There's also a 'Search inside' section with the text 'Search for articles within this journal' and a search bar labeled 'Article title or keyword'.

Annotations in red text with arrows point to specific features: 'Choosing a category will open a list in alphabetical order' points to the 'Journals by category' sidebar, and 'Each electronic magazine allows you to search for articles within it' points to the 'Search inside' section of the journal details.

The default **Search All** is the widest.
It is however possible to select some already established sets of materials by scrolling the menu on the right:

- **Library Catalogue:** to search books and journals
- **Search everything:** to search any kind of material
- **Electronic Resources:** to search only electronic resources
- **Ebsco:** to query only the databases of the Ebsco platform
- **Padua Research Archive:**
- **Research Data Unipd:** for the University's research products

BOOK

Manual of Digital Earth

Guo, Huadong.; Guo, Huadong, editor.; Goodchild, Michael F., editor.; Annoni, Alessandro. editor.
2020; 1st ed. 2020.; Singapore Springer Nature

This open access book offers a summary of the development of Digital Earth over the past twenty years. By reviewing the initial vision of Digital Earth, the evolution of that vision, the relevant key technologies, and the role of Digital Earth in helping people respond to global challenges, this publication reveals how and why Digital Earth is becoming vital for acquiring, processing, analysing and mining the rapidly growing volume of global data sets about the Earth. The main aspects of Digital Earth covered here include: Digital Earth platforms, remote sensing and navigation satellites, processing and visualizing geospatial information, geospatial information infrastructures, big data and cloud computing, transformation and zooming, artificial intelligence, Internet of Things, and social media. Moreover, the book covers in detail the multi-layered/multi-faceted roles of Digital Earth in response to sustainable development goals, climate changes, and mitigating disasters, the applications of Digital Earth (such as digital city and digital heritage), the citizen science in support of Digital Earth, the economic value of Digital Earth, and so on. This book also reviews the regional and national development of Digital Earth around the world, and discusses the role and effect of education and ethics. Lastly, it concludes with a summary of the challenges and forecasts the future trends of Digital Earth. By sharing case studies and a broad range of general and scientific insights into the science and technology of Digital Earth, this book offers an essential introduction for an ever-growing international audience.

When you log in your library card you can see:

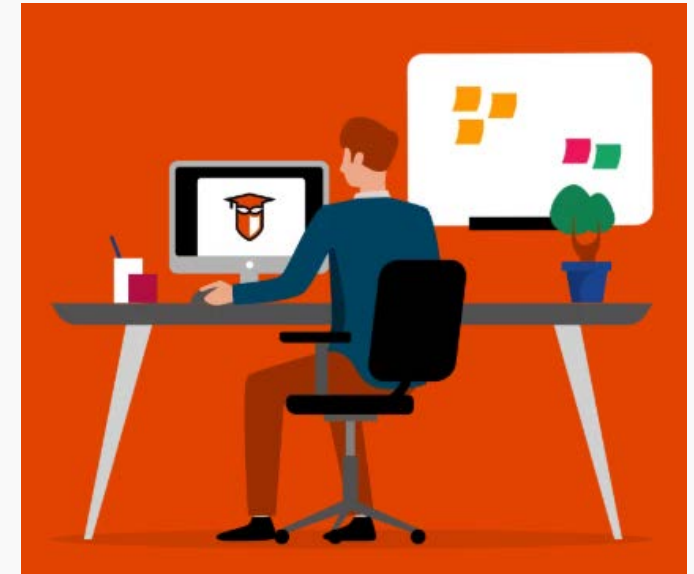

- Your current loans
- Your loan history
- You can renew one or all you loans
- Your requests (you can reserve books that are not currently available because they are out on loan)
- Your favorites
- Fines and fees

And you can switch the interface language between English and Italian

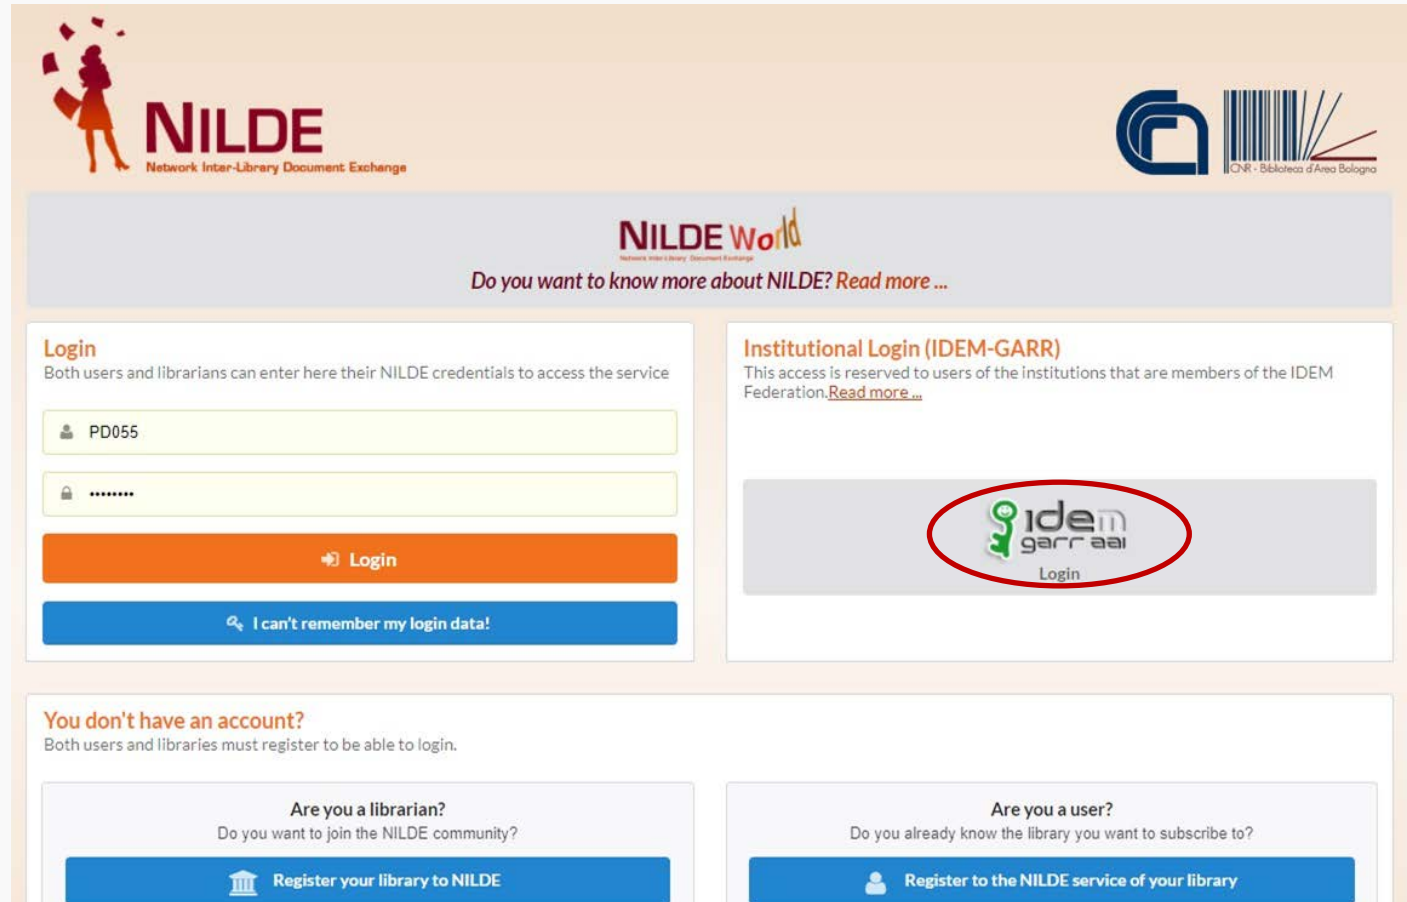

Faculty, students, and staff of the University of Padua can access electronic resources (e-resources) on campus via the University network and off campus in two ways:

- **Single Sign-On (SSO).** With this type of access, you can authenticate via SSO directly on the publisher's platform
- Using  when browsing publishers' websites, you will be recognised as if you were connecting directly from the University network, thus gaining access to available content.

Journal articles and book chapters not available in University of Padova libraries can be requested through the **Document Delivery service (DD)**.

Register your account on NILDE, using SSO credentials.

Register to the NILDE service of your library

Books not available in the University library system can be requested through the **Interlibrary Loan service (ILL)**.

The service is not for free.

Internal users may submit requests by filling out the online request form (ITA).

To guide and facilitate the user in querying online databases and catalogues, the libraries periodically organise free training courses on bibliographic research methods.

Users who need customised support in their bibliographic research activities can use the library staff's free bibliographic assistance. To arrange an appointment, get in touch with your library by email, using the online form where available, or by going to the library circulation desk during opening hours.

Contact our expert team of librarians:

- book an appointment by writing to biblio.inge@unipd.it
- via the Online Support Center. Describe your request: we commit to responding by email within three days.
- in presence at the libraries
